

LANDMARK APARTMENTS BLACKALL STREET APARTMENTS FIRST STAGE Replacement of Lift and Landing Buttons

Dear residents

Over the next few weeks, the control buttons inside the lift cars will be replaced.

Following the completion of the lift button replacement the landing call buttons on each floor will also be replaced.

This upgrade is due to the discontinuation of the original button products and the expense of replacement parts. Any part required will now have to be 3D printed to order. This is an expensive proposition as these buttons are now failing more frequently.

The replacement of the lift buttons is a maintenance responsibility, this does not form part of the motion before the AGM for lift refurbishment.

- **These works will occur weekdays and Saturdays.**
- **Only one lift will be upgraded at a time so there will always be one fully functioning lift available for use.**

Please direct any questions to Canberra Strata on (02) 6295 6888.

Kind Regards

Canberra Strata
